PROFESSIONAL SUMMARY

Banking professional with years of operational experience at BNI, transitioning into data analytics and AI workflow development. Builds AI-assisted tools using Python and the OpenAI API, applies SQL and Tableau to real business problems, and designs prompt engineering workflows that improve AI output quality. Combines structured operational thinking with self-directed technical development. Targeting roles at the intersection of data, process optimization, and applied AI.

CORE COMPETENCIES

Analytics & BI : SQL (CTEs, Window Functions), Python (Pandas, NumPy, Scikit-learn), Tableau, Power BI, Excel.
AI & Workflow : Prompt Engineering, OpenAI API, AI Agent Development, AI Workflow Design, Vibe Coding.
Data Engineering : ETL, Data Cleaning, Feature Engineering, Streamlit Deployment, SQL Server.
Banking Domain : KYC/AML Compliance, Cash Operations, Risk Management, Financial Reporting, KPI Tracking.
Professional : Process Optimization, Stakeholder Communication, Cross-functional Collaboration, Data Storytelling.

PROFESSIONAL EXPERIENCE

AI Workflow Developer

May 2024 – Present

Independent Projects | Freelance

- Built and deployed AI-assisted web apps and analytical dashboards using vibe coding workflows, integrating AI code generation to cut development time and ship functional tools faster.
- Designed prompt engineering frameworks for task-specific AI outputs, optimizing model responses across analytical, writing, and workflow automation use cases.

Independent Data Analytics Consultant

Jun 2022 – Present

Self-Directed Development | Certification & Project Work

- Built end-to-end ML projects including customer segmentation, retail sales forecasting, and predictive models deployed via Streamlit, applying Python, SQL, and Tableau across the full analytics pipeline.
- Developed interactive business intelligence dashboards and performed complex SQL data transformations, delivering analytical outputs that support strategic and operational decision-making.

PT. Bank Negara Indonesia Tbk – Jakarta, Indonesia

Priority Frontline Officer

Jan 2022 – Jun 2022

High-Value Client Relationship Management

- Managed relationships with high-value clients, delivering personalized financial solutions and analyzing client profiles to identify cross-selling opportunities that contributed to branch revenue growth.
- Coordinated cross-functionally to ensure seamless service delivery, consistently meeting satisfaction targets and promotional goals.

Cash Vault Specialist

Apr 2021 – Des 2021

Multi-Branch Cash Operations Management

- Oversaw cash inventory across an extensive branch network, maintaining optimal liquidity and exceptional accuracy in high-volume currency processing while meeting strict regulatory compliance standards.

- Implemented systematic monitoring processes that improved reconciliation efficiency and led cross-functional coordination to optimize cash logistics workflows.

Teller Operations

Mar 2020 – Mar 2021

Customer Service Excellence & Transaction Processing

- Processed comprehensive financial transactions including deposits, withdrawals, and loan operations with full regulatory compliance and audit-ready documentation.
- Demonstrated banking product expertise through effective customer engagement, contributing to branch revenue growth via consistent referrals and service quality.

Operations Division

Aug 2019 – Dec 2019

Digital Platform Infrastructure & Performance Optimization

- Maintained optimal functionality of critical digital banking platforms including Cash Recycle Machine operations, proactively diagnosing and resolving technical issues to uphold system availability.
- Collaborated with IT teams on system improvements, contributing analytical insights that supported platform performance optimization initiatives.

KEY PROJECTS

VOCUS – AI Prompt Optimization Agent

November 2025

Python | OpenAI API | Prompt Engineering

- Designed and built an AI agent that generates task-specific structured prompts to improve output quality across analytical and writing tasks.
- Engineered prompt templates by task type, reducing manual iteration and producing more consistent AI responses.

Flight Price Estimation Model

August 2024

Python | Scikit-learn | Streamlit

- Built a Random Forest regression model to predict ticket prices, deployed as an interactive Streamlit interface for real-time estimation.

Human Resource Analytics Dashboard

March 2023

Tableau | Business Intelligence

- Created an interactive Tableau dashboard tracking employee attrition, workforce demographics, and retention KPIs for HR decision-making.

EDUCATION, CERTIFICATIONS & RECOGNITION

Education

Bachelor's Degree in Economics | Economic Management Major

2014 - 2018

Gunadarma University | GPA: 3.39/4.0

Professional Certifications

- Google Advanced Data Analytics Professional Certificate (2024) – Python, ML, statistical analysis, Tableau
- Kominfo Scholarship – Data Analyst Professional Certificate (2024) – SQL, Python EDA, Matplotlib
- Python Essentials by Cisco Professional Certificate (2024) – Python, OOP, machine learning fundamentals
- Prakerja – Data Structures and Diagrams in Database Management (2024)
- Google Data Analytics Professional Certificate (2023) - Data cleansing, analysis, visualization, SQL, R, and Tableau

Professional Recognition

Professional Awards | Branch Service Excellence Award (SEA)

2022

Digital Assistant Category: Recognized for outstanding performance in digital banking operations and customer service excellence.
