EDUCATION

I graduated from Gunadarma University with a bachelor's degree in economic management.
I have a solid understanding of economic theories and principles, which allows me to analyze complex economic problems and make informed decisions. These experiences have broadened my knowledge and given me a more comprehensive perspective on current economic issues, policies, and practices. I am confident that my academic experiences have provided me with the skills and knowledge required to excel in an economics career.
My Bachelor's Degree in Economic Management not only provided me with a solid foundation in economics but also equipped me with the skills needed to apply economic principles to real-world problems. I am thrilled at the prospect of applying my knowledge and skills to positively impact society.

STRENGTH

I have a strong sense of motivation and enthusiasm that rubs off on those around me. I have a natural ability to inspire and encourage others, which has aided in the success of collaborations with colleagues and team members.
I approach my work with initiative and am committed to delivering high-quality results that exceed expectations. I approach each task with a positive attitude and a commitment to excellence, allowing me to confidently tackle even the most difficult projects.
I am deeply committed to the projects and organizations in which I am involved, and I take great pride in establishing meaningful relationships with them. This connection fuels my determination to succeed and inspires me to always strive for the best possible results.

WEAKNESS

In my previous role as a banker, I gained valuable experience adhering to specific guidelines and responsibilities in my previous role as a banker. While I thrived in this structured environment, I also recognize the value of adaptability and flexibility when dealing with ambiguous assignments or goals. I am open to new challenges and enjoy experimenting with different problem-solving approaches.
Although I have a strong work ethic and am eager to take on new challenges, I recognize the importance of setting boundaries and prioritizing my workload in order to deliver quality results on time. While I am detail-oriented, I also recognize the importance of balancing attention to detail with a focus on the big picture in order to achieve the best results.
Overall, I am committed to continuous learning and improvement, and I am confident in my ability to adapt to new situations and challenges.

PROFESSIONAL SUMMARY

Banking Professional Evolving into AI-Enhanced Data Strategist with expertise in financial analytics and emerging capabilities in Generative
AI. Combines solid foundation in data analysis (SQL, Python, Tableau) with hands-on exploration of AI agent development. Demonstrated
ability to transform complex financial data into actionable insights, with deep understanding of regulatory compliance (KYC/AML) and risk
management. Currently building expertise in AI agents and prompt engineering to enhance strategic decision-making capabilities.

CORE COMPETENCIES

Technical Expertise:

- **Programming & Analytics**: Advanced Python (Pandas, NumPy, Scikit-learn), SQL (CTEs, Window Functions, Complex Joins), R.
- **Machine Learning**: End-to-end pipeline development, predictive modeling, feature engineering, model deployment via Streamlit.
- **Data Visualization**: Advanced Tableau (calculated fields, parameters), Power BI, Excel advanced analytics.
- **Database Management**: SQL Server, data warehousing, ETL processes, multi-source data integration.
- **Emerging Technologies**: AI agent development (Google Agent Development Kit), prompt engineering, generative AI applications.

Financial Domain Expertise:

- **Banking Operations**: Multi-branch efficiency analysis (24+ locations), cash flow optimization, transaction processing.
- **Regulatory Compliance**: KYC/AML protocols, risk management, financial reporting, suspicious activity identification.
- **Business Intelligence**: Strategic dashboard development, KPI tracking, cross-functional stakeholder communication.

Professional Skills:

- **Analytics**: Statistical analysis, data-driven decision making, business forecasting, process optimization.
- **Leadership**: Cross-functional collaboration, project management, strategic problem-solving, executive reporting.
- **Communication**: Technical documentation, data storytelling, stakeholder engagement across all organizational levels.

PROFESSIONAL EXPERIENCE

Project Base Experience & Independent Data Analytics Consultant Jun 2022 – Present

Self-Directed Professional Development & Certification Achievement

- **Completed** comprehensive data analytics certification pathway including Google Advanced Data Analytics, Kominfo Data Analyst Program, and specialized database management courses.
- **Developed** end-to-end machine learning projects including customer segmentation using clustering algorithms, retail sales forecasting with time series models, and interactive regional performance dashboards.
- **Active contributor** in Pelajar Data community (@pelajardata) fostering knowledge sharing in Indonesian data science ecosystem.

Technical Project Portfolio

- **Machine Learning Implementation**: Built predictive models using Python (Scikit-learn, Pandas) with complete pipeline from data preprocessing to model deployment via Streamlit.
- **Business Intelligence Solutions**: Created advanced Tableau dashboards with calculated fields and parameters for strategic decision-making.
- **Database Analytics**: Executed complex SQL operations including CTEs and window functions for comprehensive data exploration and transformation.

Consulting & Technical Advisory

- **Provided** technical guidance for gaming community server development, managing operations and user engagement strategies.
- **Supported** event management coordination for major Indonesian brands, contributing to logistics and stakeholder communication.

PT. Bank Negara Indonesia Tbk – Jakarta, Indonesia

Priority Frontline Officer *| High-Value Client Relationship Management* *Jan 2022 – Jun 2022*

- **Delivered** premium banking services to high-value clients with focus on personalized financial solutions and relationship management.
- **Achieved** consistent customer satisfaction through consultative approach and strategic product recommendations.
- **Collaborated** cross-functionally to ensure seamless service delivery and promotional target achievement.

Cash Vault Specialist *| Multi-Branch Cash Operations Management* *Apr 2021 – Des 2021*

- **Managed multi-branch** cash inventory operations across extensive branch network ensuring optimal liquidity management.
- **Maintained** exceptional accuracy in high-volume currency processing while adhering to strict regulatory compliance standards.
- **Implemented** systematic monitoring processes improving reconciliation efficiency and reducing operational discrepancies.
- **Led cross-functional** coordination enhancing cash logistics workflow and processing optimization.

Teller Operations (Bina BNI) *| Customer Service Excellence & Transaction ProcessingMar 2020 – Mar 2021*

- **Processed** comprehensive financial transactions including deposits, withdrawals, and loan operations with regulatory compliance focus.
- **Maintained** meticulous account documentation through systematic reconciliation and audit-ready record keeping.
- **Demonstrated** banking product expertise contributing to branch revenue through effective customer engagement and referrals.

***Operations* Division** | Digital Platform Infrastructure & Performance Optimization*Aug 2019 – Des 2019*

- **Ensured** optimal functionality of critical digital banking platforms, particularly Cash Recycle Machine operations.
- **Proactively diagnosed** and resolved technical issues maintaining high system availability and user experience standards.
- **Collaborated** with IT teams on system improvements and contributed insights for platform optimization initiatives.

KEY PROJECTS

Machine Learning & Predictive Analytics

Flight Price Estimation Model *August 2024*

- **Developed** Random Forest regression model using Python (Scikit-learn, Pandas) to predict flight ticket prices based on multiple variables.
- **Implemented** comprehensive data preprocessing pipeline with feature engineering and model validation techniques.
- **Deployed** interactive prediction interface via Streamlit enabling real-time price estimation for travel optimization.

Business Intelligence & Visualization

Human Resource Analytics Dashboard *March 2023*

- **Created** interactive Tableau dashboard analyzing employee attrition patterns with calculated fields and dynamic parameters.
- **Provided** HR managers with real-time insights into workforce demographics, retention metrics, and performance indicators.
- **Enabled data-driven** decision making for talent management and organizational planning initiatives.

Engineering & Analysis

COVID-19 Global Data Exploration *February 2023*

- **Transformed** large-scale pandemic datasets using advanced SQL (CTEs, window functions, complex joins).
- **Built** comprehensive vaccine distribution tracker with Tableau visualization showing regional trends and patterns.
- **Delivered** insights supporting informed analysis of international pandemic response effectiveness.

Real Estate Data Transformation *March 2023*

- **Cleaned and optimized** Nashville housing dataset using SQL Server Management Studio with focus on data quality assurance.

- **Applied** systematic data transformation including date formatting, address standardization, and duplicate removal.
- **Enhanced** dataset reliability for strategic real estate analytics and business forecasting applications.

Emerging Technology Exploration

AI Agent Development *Ongoing*

- **Exploring** conversational AI and agent architecture using Google Agent Development Kit.
- **Developing** understanding of prompt engineering methodologies and AI model interaction optimization.
- **Investigating** practical applications of generative AI in business process automation and customer service enhancement.

EDUCATION, CERTIFICATIONS & RECOGNITION

Education

Bachelor's Degree in Economics *| Economic Management Major* *2014 - 2018*

Gunadarma University | GPA: 3.39/4.0

Professional Certifications

Advanced Data Analytics & Machine Learning

- **Google Advanced Data Analytics** Professional Certificate (2024) - Statistical analysis, Python programming, machine learning using Jupyter Notebook and Tableau.
- **Kominfo Scholarship** - Data Analyst Professional Certificate (2024) - Applied SQL, Python exploratory data analysis, Matplotlib data visualization with hands-on projects.

Programming & Database Management

- **Python Essentials** by Cisco Professional Certificate (2024) - Python programming, OOP, machine learning concepts with practical applications
- Prakerja - **Data Structures and Diagrams** in Database Management (2024) - Database methodologies, data models, and design optimization

Foundational Data Analytics

- **Google Data Analytics** Professional Certificate (2023) - Data cleansing, analysis, visualization using SQL, R programming, and Tableau

Professional Recognition

Professional Awards *| Branch Service Excellence Award (SEA)* *2022*

Digital Assistant Category: Recognized for outstanding performance in digital banking operations and customer service excellence.
