VIKKO PUTRA HASIAN HUTAPEA

DATA ANALYST | AI ENTHUSIAST | BANKING PROFESSIONAL

Jakarta Selatan - 12450, Indonesia | (62) 812 3199 2234 | vikkoputra@gmail.com
LinkedIn: vikko-putra | Portfolio: Notion-Vikko-Putra

PROFESSIONAL SUMMARY

Banking Professional Evolving into **AI-Enhanced Data Strategist** with expertise in financial analytics and emerging capabilities in **Generative AI**. Combines solid foundation in **data analysis** (SQL, Python, Tableau) with hands-on exploration of **AI agent development**. Demonstrated ability to transform complex financial data into **actionable insights**, with deep understanding of **regulatory compliance** (KYC/AML) and risk **management**. Currently building expertise in AI agents and prompt engineering to enhance **strategic decision-making** capabilities.

CORE COMPETENCIES

Technical Expertise:

- **Programming & Analytics**: Advanced Python (Pandas, NumPy, Scikit-learn), SQL (CTEs, Window Functions, Complex Joins), R.
- **Machine Learning**: End-to-end pipeline development, predictive modeling, feature engineering, model deployment via Streamlit.
- **Data Visualization**: Advanced Tableau (calculated fields, parameters), Power BI, Excel advanced analytics.
- **Database Management**: SQL Server, data warehousing, ETL processes, multi-source data integration.
- **Emerging Technologies**: AI agent development (Google Agent Development Kit), prompt engineering, generative AI applications.

Financial Domain Expertise:

- **Banking Operations**: Multi-branch efficiency analysis (24+ locations), cash flow optimization, transaction processing.
- **Regulatory Compliance**: KYC/AML protocols, risk management, financial reporting, suspicious activity identification.
- **Business Intelligence**: Strategic dashboard development, KPI tracking, cross-functional stakeholder communication.

Professional Skills:

- **Analytics**: Statistical analysis, data-driven decision making, business forecasting, process optimization.
- **Leadership**: Cross-functional collaboration, project management, strategic problem-solving, executive reporting.
- **Communication**: Technical documentation, data storytelling, stakeholder engagement across all organizational levels.

PROFESSIONAL EXPERIENCE

Project Base Experience & Independent Data Analytics Consultant — Jun 2022 – Present

Self-Directed Professional Development & Certification Achievement

- **Completed** comprehensive data analytics certification pathway including Google Advanced Data Analytics, Kominfo Data Analyst Program, and specialized database management courses.
- **Developed** end-to-end machine learning projects including customer segmentation using clustering algorithms, retail sales forecasting with time series models, and interactive regional performance dashboards.
- **Active contributor** in Pelajar Data community (@pelajardata) fostering knowledge sharing in Indonesian data science ecosystem.

Technical Project Portfolio

- **Machine Learning Implementation**: Built predictive models using Python (Scikit-learn, Pandas) with complete pipeline from data preprocessing to model deployment via Streamlit.
- **Business Intelligence Solutions**: Created advanced Tableau dashboards with calculated fields and parameters for strategic decision-making.
- **Database Analytics**: Executed complex SQL operations including CTEs and window functions for comprehensive data exploration and transformation.

Consulting & Technical Advisory

- **Provided** technical guidance for gaming community server development, managing operations and user engagement strategies.
- **Supported** event management coordination for major Indonesian brands, contributing to logistics and stakeholder communication.

PT. Bank Negara Indonesia Tbk – Jakarta, Indonesia

Priority Frontline Officer | *High-Value Client Relationship Management* — *Jan 2022 – Jun 2022*

- **Delivered** premium banking services to high-value clients with focus on personalized financial solutions and relationship management.
- **Achieved** consistent customer satisfaction through consultative approach and strategic product recommendations.
- **Collaborated** cross-functionally to ensure seamless service delivery and promotional target achievement.

Cash Vault Specialist | *Multi-Branch Cash Operations Management* — *Apr 2021 – Des 2021*

- **Managed multi-branch** cash inventory operations across extensive branch network ensuring optimal liquidity management.
- **Maintained** exceptional accuracy in high-volume currency processing while adhering to strict regulatory compliance standards.
- **Implemented** systematic monitoring processes improving reconciliation efficiency and reducing operational discrepancies.
- **Led cross-functional** coordination enhancing cash logistics workflow and processing optimization.

Teller Operations (Bina BNI) | *Customer Service Excellence & Transaction Processing* *Mar 2020 – Mar 2021*

- **Processed** comprehensive financial transactions including deposits, withdrawals, and loan operations with regulatory compliance focus.
- **Maintained** meticulous account documentation through systematic reconciliation and audit-ready record keeping.
- **Demonstrated** banking product expertise contributing to branch revenue through effective customer engagement and referrals.

***Operations* Division** | Digital Platform Infrastructure & Performance Optimization *Aug 2019 – Des 2019*

- **Ensured** optimal functionality of critical digital banking platforms, particularly Cash Recycle Machine operations.
- **Proactively diagnosed** and resolved technical issues maintaining high system availability and user experience standards.
- **Collaborated** with IT teams on system improvements and contributed insights for platform optimization initiatives.

KEY PROJECTS

Machine Learning & Predictive Analytics

Flight Price Estimation Model *August 2024*

- **Developed** Random Forest regression model using Python (Scikit-learn, Pandas) to predict flight ticket prices based on multiple variables.
- **Implemented** comprehensive data preprocessing pipeline with feature engineering and model validation techniques.
- **Deployed** interactive prediction interface via Streamlit enabling real-time price estimation for travel optimization.

Business Intelligence & Visualization

Human Resource Analytics Dashboard *March 2023*

- **Created** interactive Tableau dashboard analyzing employee attrition patterns with calculated fields and dynamic parameters.
- **Provided** HR managers with real-time insights into workforce demographics, retention metrics, and performance indicators.
- **Enabled data-driven** decision making for talent management and organizational planning initiatives.

Engineering & Analysis

COVID-19 Global Data Exploration *February 2023*

- **Transformed** large-scale pandemic datasets using advanced SQL (CTEs, window functions, complex joins).
- **Built** comprehensive vaccine distribution tracker with Tableau visualization showing regional trends and patterns.
- **Delivered** insights supporting informed analysis of international pandemic response effectiveness.

Real Estate Data Transformation *March 2023*

- **Cleaned and optimized** Nashville housing dataset using SQL Server Management Studio with focus on data quality assurance.
- **Applied** systematic data transformation including date formatting, address standardization, and duplicate removal.
- **Enhanced** dataset reliability for strategic real estate analytics and business forecasting applications.

Emerging Technology Exploration

AI Agent Development *Ongoing*

- **Exploring** conversational AI and agent architecture using Google Agent Development Kit.
- **Developing** understanding of prompt engineering methodologies and AI model interaction optimization.
- **Investigating** practical applications of generative AI in business process automation and customer service enhancement.

EDUCATION, CERTIFICATIONS & RECOGNITION

Education

Bachelor's Degree in Economics | *Economic Management Major* *2014 - 2018*

Gunadarma University | GPA: 3.39/4.0

Professional Certifications

Advanced Data Analytics & Machine Learning

- **Google Advanced Data Analytics** Professional Certificate (2024) - Statistical analysis, Python programming, machine learning using Jupyter Notebook and Tableau.
- **Kominfo Scholarship** - Data Analyst Professional Certificate (2024) - Applied SQL, Python exploratory data analysis, Matplotlib data visualization with hands-on projects.

Programming & Database Management

- **Python Essentials** by Cisco Professional Certificate (2024) - Python programming, OOP, machine learning concepts with practical applications
- Prakerja - **Data Structures and Diagrams** in Database Management (2024) - Database methodologies, data models, and design optimization

Foundational Data Analytics

- **Google Data Analytics** Professional Certificate (2023) - Data cleansing, analysis, visualization using SQL, R programming, and Tableau

Professional Recognition

Professional Awards | *Branch Service Excellence Award (SEA)* *2022*

Digital Assistant Category: Recognized for outstanding performance in digital banking operations and customer service excellence.
